Section B: Traveler

Line	Operation	Description	Required	Operator	Date (D/M/Y)
1	Visual Inspection	Inspect all parts for damage, surface finish concerns and part quality	Yes		
2	Initial Cleaning Alkaline Wash	Manually clean excessive soil prior to racking (when necessary)	No		
3	Masking	Mask threaded holes as noted on the specification	No		
4	Racking	Ensure solid contact and minimize rack marks – rack on I.D. where possible	Yes		
5	Secondary Cleaning Alkaline Immersion	Immersion in cleaning tank on racking – 5-30 minutes depending on cleanliness	Yes		
6	Caustic Etch Rinse	Immersion in 115-120 deg F tank for 30 Secs- 5 minutes depending on existing oxidation	Yes		
7	Acid Etch Rinse	Immersion in 120 deg F tank for 4-6 mins minutes	No		
8	DeOx Rinse	Immersion in ambient tank for 5-10 minutes and verify parts free of smut	Yes		
9	Anodize Rinse	Parts to be ran at correct tank temperature and current density/voltage	Yes		
10	Neutralize Rinse	Immersion in nitric acid on racking for 5-10 minutes followed by thorough rinsing	No		
11	Dye Rinse	Immersion of parts racked or unracked in correct dye and temperature until saturated	No		
12	Seal Rinse	Immersion in nickel acetate seat at 165-185 deg F for 5-20 minutes	Yes		
13	Dry	Dry water from parts with compressed air and allow to hang dry for 15 minutes	Yes		
14	Un-Rack	Un-rack parts careful not to scratch or damage surfaces and remove masking	Yes		
15	Technical Inspect	Inspect parts for even coating, note acceptable rack marks, verify colors	Yes		
16	Commercial Inspection	WO entries complete, marking correct, visual inspection of part	Yes		
17	Package	Securely and professionally package parts for shipment	Yes		
18	Final Acceptance	Supervisor acceptance of packaging quality and documentation	Yes		
19	Product Release	Release of product by HAMF and acceptance by customer	Yes		

Section C: General Notes
